

Version v.3.0.1

Version 3.0.1 will be a minor release, mainly necessary for fixing CVE-2020-11023 and CVE-2020-11022 (jQuery Vulnerability)

Release of ACD Version 3.0.1 on March 15th

It will include the following fixes

- Fix for CVE-2020-11023 and CVE-2020-11022 (jQuery Vulnerability)
 - In jQuery versions, greater than or equal to 1.2 and before 3.5.0 may execute untrusted code. This problem is patched in jQuery 3.5.0.
 - CVE = Common Vulnerabilities and Exposures and is a list of publicly known cybersecurity vulnerabilities.
 - ACD will be changed to the last stable release of jQuery 3.5.1
- Spelling Improvements
- Completed Migration Wizard
- Fix for some existing Reports (existing but not detected problems since 2016)
- AuditDriver Monitor optimization (no ES mapping rules in each request, load reduction for ES)
- Web Page when the user logged out
